

VAIBHAVI MASAL

Full Stack Developer (React / REST APIs)

linkedin.com/in/VaibhaviMasal | github.com/VaibhaviMasal | vaibhavimasal24@gmail.com | +91 84465 05484

Professional Summary

Information Technology undergraduate and full-stack developer with hands-on experience building React front ends and RESTful, layered-architecture backends as a Product Development Intern at Kanini Software Solutions. Strong grounding in JavaScript, Object-Oriented Programming and SOLID Principles, with practical experience designing and integrating REST APIs, implementing CRUD operations, and working across the full stack from UI to database. Passionate about clean code, scalable web applications and AI-powered products.

Technical Skills

Languages: JavaScript, C#, SQL, HTML, CSS
Frontend: React.js, Bootstrap, Tailwind CSS
Backend: REST API Design & Integration, ASP.NET Core Web API, .NET, FastAPI
Databases: SQL Server, MySQL
AI & APIs: Gemini API, REST APIs
Tools: Git, GitHub, Postman, Visual Studio, VS Code
Core Concepts: Object-Oriented Programming, SOLID Principles, CRUD Operations, RESTful Architecture, DBMS, Data Structures & Algorithms

Experience

Product Development Intern June 2026 – Present
Kanini Software Solutions

- Developing and delivering full-stack web applications using React, ASP.NET Core Web API and SQL Server.
- Designing and integrating RESTful APIs, and implementing secure, maintainable CRUD operations following layered architecture – directly applicable to building and integrating REST APIs between frontend and backend systems.
- Applying Object-Oriented Programming and SOLID Principles to build clean, maintainable backend services.
- Testing and validating APIs using Postman while debugging and resolving application issues, ensuring code quality.
- Collaborating in Agile development through code reviews, cross-functional discussions and feature implementation.

Projects

Finance & Insurance Management System / *ASP.NET Core Web API, React, SQL Server*

- Developed a scalable Finance & Insurance Management System implementing customer and policy management modules.
- Designed REST APIs, secure CRUD operations and layered architecture following SOLID Principles.
- Improved maintainability through modular backend services.

TravelBuddy – AI Travel Planner / *React, Flask, Python, Gemini API*

- Developed an AI-powered travel planning platform generating personalized itineraries.
- Integrated Gemini API for itinerary generation, budget estimation and activity recommendations.
- Built a responsive React interface delivering an improved user experience.

AI Interview Preparation Platform (Upcoming Project) / *React, ASP.NET Core Web API, C#, SQL Server, FastAPI, Gemini API*

- Planning to build an AI-powered interview preparation platform simulating recruitment processes for product-based and service-based companies.
- Will implement ATS resume analysis with AI-driven recommendations and interview readiness assessment.
- Will design AI-generated aptitude, DSA, technical and HR interview workflows with performance analytics.
- Will develop scalable REST APIs using ASP.NET Core Web API, SQL Server, layered architecture and SOLID Principles.

Education

Bachelor of Engineering (Information Technology) 2023 – 2027
Trinity Academy of Engineering, Pune
CGPA: 9.71 / 10

Certification

- Python Programming Certificate – CodeWithHarry
